

Company

**Windy City Power, LLC
dba**

Windy City Green Power

Team

Dan Cummane, President and CEO

- Construction Management Experience
- Certified Small Wind Turbine Installer

Tom Piazza, CFO

- Certified Consulting Meteorologist
- President of Murray and Trettel, Inc.

Victoria Wright

- Attorney, First Investor

David James

- Meteorologist, Sales and Marketing Director

Mission

Use new technology to:

- to create small wind farms
- in urban and suburban areas
- on land that is otherwise unproductive

Concept

**Innovative
first of its kind
surface mounted
mobile platform
for small wind turbines**

Benefits of Small Wind

Environmental Impact and Zoning

- Fewer licensing and zoning requirements
- Less complicated environmental studies
- Less NIMBY issues

Site and Height

- Lower height
- Small wind feasible in areas that would object to taller structures

Benefits of Small Wind

Rate of Return Factors

- Small wind farm concept brings power directly to a nearby business
- Less extensive utility involvement or grid purchase agreements
- Ownership options

Efficiency

- Little or no power is lost in transmission
- 100 ft spacing or 4 turbines per acre

Benefits of Small Wind

Cost

- Approximately \$18,500 per turbine – installed
- Depends upon site and installation issues
- Likely discount for multiple turbine purchase
- State and federal incentives and tax credits for renewable energy

WINDY CITY
GREEN POWER

The Base

The Prototype

The Turbine

Skystream 3.7

- Tried and true design
- Reliability and history
- Quiet Operation
- Rated Capacity – 2.4 kW

The Turbine

Skystream 3.7

- Rotor Diameter – 12 ft.
- Height – 35 ft. with WCGP base
- Cut in speed – 8 mph
- Controls and inverter built in

Potential uses

Small turbine with concrete cube base

- Landfill
- Landfill with landfill gas to energy installation
- Brownfield/Contaminated sites
- Municipality or County can offer low cost electricity as a business incentive

Potential uses

Small turbine with concrete cube base

- Construction sites without utility power
- Commercial or retail site
- Lease or ownership options
- Land that may be developed, remediated or change use several years in the future
